

Private & Confidential  
**Trans Patients:**

## NHS Grampian request to make a link between your pre and post transition Medical Records

As a trans patient, you are entitled by law to have your former gender identity kept confidential. However, if you have a pre-existing health condition when you transition, for example diabetes or a cardiac condition, it will still be present after transition. It would greatly assist doctors treating you in future to know your full medical history.

This information would be restricted access only. NHS Grampian would like your permission to make a link between your old and new Medical Records.

**This is only a request, the decision is yours.** Please complete the appropriate box below:

I agree to NHS Grampian making a link between my pre and post transition Medical Records.	
Name:	
Address:	
Signature:	
Date:	

I do not agree to NHS Grampian making a link between me pre and post transition Medical Records and take full responsibility for the decision	
Name:	
Address:	
Signature:	
Date:	

**Please hand this Mandate to the doctor or receptionist.**
