

Dear Patient,

LONG TERM CONDITIONS – MONTH OF BIRTH: PATIENTS WITH DIABETES (NO RESPIRATORY CONDITIONS) – ANNUAL REVIEW

Please note that this is the only invitation for a Long Term Conditions review that you will receive for this year

About the Annual Check up

There have been some positive changes to how we are planning to help you manage your long-term condition(s). We call this Care and Support Planning and we want to help you be more involved in the decisions that affect you. You are invited to attend, for a review, in the month of your birth every year; and this is how things will work:

You are invited to call the practice in the preceding month of your birth, in order to arrange a Review appointment in the month of your birth. Generally this will be with the Practice Nurse, but you will be informed by our Clinical Administrators if it is to be with the GP. The appointment will be:

- A 30 minute Information Gathering appointment requiring:
 - Blood test – you must not have consumed any meat within 12 hours prior to the blood test. Taking blood can be made easier if you have a good drink of water about an hour before the test; and by keeping your hands warm.
 - Urine sample taken first thing in the morning of the blood test if you are a diabetic or CKD patient.

Contact the practice after 11:00 in the preceding month of your birth in order to make your appointments. Tell the Clinical Administrator that you have been sent Letter **H3** – they have instructions for whom you are to see as well as the precise timings of your appointments.

The Information Gathering Appointment

The Information Gathering appointment will generally be with the Healthcare Assistant, and may include blood pressure, weight, blood tests, foot checks (Diabetes) and/or Health Questionnaires. During this appointment we will ask you to consent to having your results either: posted to you, e-mailed, by notification for you to collect it from the Practice. You can withdraw consent or change your mind about how the information gets to you at any time – just keep us informed about how you'd like us to communicate with you.

Sharing information. After your first appointment, and once all the results are available, they will be sent to you on request. It is important that you have the same information as the Practice Nurse or GP who sees you for any future appointment. Having the results beforehand will help you think about what they mean to you and what you might like to discuss. You might like to talk about your results with a family member or close friend.

Additional information

Housebound patients. Please let us know if you are currently housebound so that we can make alternative arrangements for your care and support planning. Our Clinical Administrators have been advised of those patients for whom may require a home visit.

Contact details. Please take the time to check that we have your up-to-date contact details; and let us know if anything has changed.

Additional information. Our Long Term Conditions information is included on our website and if you have any concerns or questions regarding this please do not hesitate to contact us. We do look forward to seeing you soon, but please remember that it is important that you advise the practice if you are unable to attend any of your appointments; and please feel free to contact any of our Clinical Administrators if you have any further questions.

Building a picture of your health is really important for us to be able to help you manage your long term conditions, and the QR codes below provide information and forms on our website where you can provide us with information.
